

A photograph of a laboratory bench. In the foreground, a clear glass beaker contains a yellowish liquid. To its right, a larger glass bottle also contains a yellowish liquid. In the background, there is a piece of laboratory equipment, possibly a pipette or a small scale, and a rack holding several glass test tubes. The surface is a light-colored, smooth material, likely the Chemsurf laminate being advertised.

Chemsurf®

Chemical-Resistant Laminate

Where Function + Form really add up

A decorative graphic consisting of several concentric, overlapping circles in a light green color, located in the bottom right corner of the green banner.

When you need to specify a surface that is resistance to the harshest of acids, bases and solvents — but not at the expense of design and style —Wilsonart® Chemsurf® chemical-resistant laminate answers the challenge. Specifically designed for highly corrosive environments, Chemsurf provides exceptional chemical resistance in most Wilsonart® Laminate standard designs. This versatile laminate is not only lighter in weight, but is often less expensive upfront and over its life cycle, than slate, stainless steel or epoxy. It is ideal also for applications where harsh cleaning agents may be over-used and damage other decorative surfaces.

Wilsonart® Chemsurf® Laminate

Key Features

- Type 390 is intended for horizontal, vertical and postformed work surfaces, including those featuring a simple radiused edge. Such postforming eliminates seams which are otherwise vulnerable to chemical attack. Type 390 may be applied to any horizontal or vertical surface where a functional, durable, decorative material should also be chemical-resistant.
- Postformable for no-drip edges
- Available in 4-foot and 5-foot widths, and 8-foot, 10-foot and 12-foot lengths
- #60 finish option
- Available in most Wilsonart Laminate standard designs. See **“Pattern Availability”** at wilsonartcontract.com for design availability

Certification Compliance

- GREENGUARD® Indoor Air Quality Certified
- Scientific Equipment & Furniture Association No. 8.1 approved
- MEA 262-95-M, New York City Material Equipment Acceptance
- FSC Solutions available on request
- ANSI/NEMA LD3-2005 for HGP Postforming Laminate
- ISO 4586 Standards

Product Usage

Wilsonart Chemsurf is an excellent decorative surface for cabinets, case work, counters and countertops in chemistry, biology and pharmaceutical laboratories, hospitals, medical/dental examination rooms, dialysis centers, nurses' stations and pathologists' work rooms as well as in school labs, photography labs and darkrooms, beauty salons and product testing facilities.
