**Product Descriptions**
**Recommended Uses:**

Wilsonart® Durasteel™ Sinks are specially shaped stainless brush polish sinks and bowls commonly used as kitchen and bar sinks and lavatories. They are ideal for Wilsonart Laminate, and Wilsonart Solid Surface, as well as granite, engineered stone, and other countertop surfaces.

**Product Composition:**

The product is composed of 304 series alloy stainless, featuring the highest quality 18/10 chrome-nickel formulation. Wilsonart Durasteel™ sinks and bowls have a complete hygienic, rust-free, and extremely durable surface that is made from heavy-duty 18 gauge non-porous material. The brush polish finish enables the sink to keep its beauty for years. The surface provides superior resistance to stains, heat, impacts, bacteria, scratches, and thermal shock.

Stainless steel sinks are found in many applications other than the traditional kitchen, applications such as kitchenettes for entertainment areas, game rooms, family rooms, nurseries, utility rooms, basements, shops and master bedrooms to complete the convenience of a kitchenette. These applications are a few of the many uses for stainless steel sinks.

## Codes and Certifications

### General Standards

Wilsonart Durasteel™ Sinks are pending certification by the National Association of Home Builders and the Canadian Standards Association.

## Care and Maintenance

The Durasteel sink surface may be cleaned with warm water, ammonia, and mild soaps, such as those used for hands and dishes. It is important to rinse and dry after every use, drying is important to eliminate any build up from hard water deposits.

For more aggressive cleaning, Scotch-Brite pad and/or Comet™, Soft Scrub™, Mr. Clean™ and Bar Keepers Friend® (Shiny Sinks Plus®) can be used to remove stubborn stains and stains caused by rust from outside source (water, steel wool, cookware, etc...). It is always important to rub or work with the grain direction, not across it. Most stains are a result of hard water.

### Simple Precautions

- Do not use steel wool on your stainless steel sink.
- Do not use cleansers that contain acids or alkalis; other strong acids (denture cleanser, photography, developing liquids) can also damage the surface of stainless steel.
- Bleaches containing hypochlorite can damage the surface of the material and increase staining.
- Do not leave soaps, cleaners, foods (citric juices, mustard, mayonnaise, pickles, vinegar, salt, etc...) to dry or prolonged periods as it may cause pitting and corrosion.
- Do not leave rubber mats, wet sponges, cloths or cleaning materials sitting in the sink.

If un-wanted material comes in contact with the stainless steel, sink should be washed immediately with clean water and towel dried.

Regular maintenance will keep your sink looking great and performing at a high standard.
